

NURS 102

CHARACTERISTICS of the ③

BRVW

like
sharles

MOVEMENT - self-initiated

self-initiated -
movement

change in position, motion of
internal part

RESPONSES AND - instantly - Ability to sense

changes within, or around to again and react to them.

GROWTH

Increase in body size

Reproduction
modulus offspring

Respiration
obtain O₂

Digestion
chemically

Absorption

comatose patients # Smooth muscles

Alzheimers - react - brain stimulation -

intensity, intensity, response - response -

- we grow - hormones. At thyroid - grow -

Growth hormone, pituitary gland - let on bone -

in length or width - gigantism -

to reproduce - procreate - copulations - Sperm -

head-tail - sperm analysis - morphology

count - every cube with 10m Sperm -

head - and tails -

September 1
